

Hurricane Lab's Hack Challenge

What: Jordan Wiens Leads Hurricane Lab's Hack Challenge

When: 5:30 p.m. Wednesday, February 3rd

Where: 4401 Rockside Road, Suite 310 (Independence)

Cost: FREE. Pre-registration encouraged: hurricanelabs.com

More Details:

Jordan Wiens (Psifertext) will lead this hack challenge open to both advanced and beginning hackers testing their ability to quickly and efficiently breakdown a mock network. This "capture the flag" style-contest will have flags with different point values. A Linux shell server with some hacking tools will be provided. A limited number of Windows laptops given on a first-come first-serve basis though competitors are encouraged to bring their own hardware and software. A live hacking demonstration will be given to non-participants curious to learn how it's all done. First, second and third place prizes will be awarded along with light refreshments.

About Hurricane Labs

Hurricane Labs (www.hurricanelabs.com) is a networking and security-monitoring firm based in Cleveland. The firm processes millions of events every day and helps clients develop awareness of what is happening on their network.

About Jordan Wiens

Wiens has an extensive professional security career with stints as a senior security engineer for a major public university, a security researcher, and writer for technical magazines. He has taught reverse engineering, vulnerability research, and web security at multiple universities, government organizations, and conferences. After dark, he likes participating in CTF games, winning the '07 RSA "Interactive Testing Challenge", and is very grateful to be a member of the '07-'08 Defcon (www.defcon.org) CTF winning team first place.
